

RackerTracker

FOR BARS AND POOL HALLS

Put your pool tournament on the bar TV

Run the night from your phone with RackerTracker, and the whole room sees a live board: who's on which table, who's up next, the standings, payouts and the champion. It updates itself as matches are reported. Nobody touches the remote.

1

Get RackerTracker TV on the screen

Free on Roku, Amazon Fire TV, Google TV and Samsung Smart TVs: search "RackerTracker TV" in the TV's app store. No app? Cast from your phone with Chromecast, or open racker-tracker.com/tv.html in any TV or laptop browser.

2

Note the 4-character code on the TV

The TV shows a short screen code when it starts. That's the only thing you need from it.

3

Connect it from your phone

In the RackerTracker app, open your tournament, tap **Manage**, then **Show on a TV**. Enter the code and tap Connect. The board appears in seconds. Next tournament, just enter the same code again.

Walk-ins sign up themselves. A join QR on the board lets players register from their own phone.

Your look. Add your bar's logo, a clock and a sponsor line, and choose where each panel goes.

Any format. 8, 9 and 10-ball; single or double elimination, round robin and multi-life.

Singles, doubles, teams. Players get notified when it's their turn to play.

Free for players on iPhone and Android.

Organizers start with a free trial. Questions or a walkthrough for your venue: support@racker-tracker.com · racker-tracker.com
